The Fort Worth-based image consulting firm Elaine Stoltz Image has launched a helpful new Web site with easy-to-follow tips on how to look your best. This week's tips are on sunless tanning. The site recommends applying regular lotion before a sunless tanner to help prevent dark spots and blotches.

The blog, called Elaine's Image Tips, is updated regularly in response to questions from clients and from readers' comments. Check out the blog at www.stoltzimage.com.
